SUMMARY

Senior Software Engineer with 7+ years building and scaling full-stack applications across **Java, TypeScript, and Python**. Skilled in crafting responsive, user-centric frontends with **React and Next.js**, and designing REST APIs and microservices with **Spring Boot, Node.js, and FastAPI**; leading and mentoring engineers; and deploying resilient, event-driven systems on AWS and GCP.

WORK EXPERIENCE

Senior Software Engineer — eHealth Africa, Nigeria

December 2023 – Present

- Deployed EHACare as a multi-tenant SaaS application, scaling the platform to serve multiple clinics.
- Optimized AWS SES handling of invalid emails, reducing bounced notifications by 80%.
- Integrated EHACare Booking with Prometheus, Grafana, and Loki for monitoring and observability.
- Led the integration of EHACare with BetterCare, enhancing medical record operations.
- Mentored junior developers, fostering professional growth.

Tech Stack: TypeScript, Python, Next.js, FastAPI, GCP, AWS, Docker, Jest

Software Engineer — EHA Clinics, Nigeria

June 2022 – November 2023

- Developed EHACare, including a React/Next.js dashboard enabling physicians to manage patient profiles and monitor activity, boosting productivity by 30%.
- Built EHACare Booking, streamlining clinic and clinician profile management.
- Integrated EHACare with BetterCare for medical record operations.
- Wrote AQL queries for CRUD operations on the BetterCare server.

Tech Stack: TypeScript, Python, Next.js, FastAPI, GCP, AWS, Docker, Jest

Software Engineer — Hackerbay, Remote (USA)

November 2020 – May 2022

- Improved OneUptime by building React dashboards and enhancing APIs, increasing client engagement by 25%.
- Migrated a JavaScript codebase to TypeScript, improving type safety and reducing bugs.
- Increased test coverage to 90% and optimized automated messaging with Twilio, boosting client responsiveness by 25%.
- Built a CI/CD pipeline for deploying Docker images across OS architectures.

Tech Stack: TypeScript, React, Node.js, Express, MongoDB, Docker, Microservices, RabbitMQ

Software Engineer — Providence Research, Nigeria

February 2020 – November 2020

- Built the UI and REST APIs for the Astrapolaris Loan Application, improving loan-management accessibility for farmers.

- Implemented microservices with Spring Boot and RabbitMQ, optimizing service-to-service communication.

Software Engineer — Info-Links, Nigeria (Part-time)

February 2018 – January 2020

- Built high-performance web UIs and REST APIs, and mentored interns in software development best practices.

SKILLS

- **Languages:** Java, TypeScript/JavaScript, Python
- **Frontend:** React.js, Next.js, Vue.js, Redux, Sass, Bootstrap, Tailwind CSS, Responsive/Accessible UI
- **Backend:** Spring Boot, Spring Security, Spring Cloud, JPA/Hibernate, Node.js, Express, FastAPI, Flask
- **Data & Messaging:** PostgreSQL, MySQL, MongoDB, Redis, pgvector, RabbitMQ, Flyway
- **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, CI/CD, Git
- **Practices:** REST APIs, Microservices, Event-Driven Architecture, JWT/OAuth Security, WebSockets, Unit & Integration Testing, OpenAPI/Swagger, Leadership & Mentoring

PROJECTS

NairaCore — Core Banking REST API (Java 17, Spring Boot, PostgreSQL, RabbitMQ) — github.com/adeoluwadavid/nairacore

- Built a modular-monolith banking API with a double-entry ledger, idempotent transactions, and JPA optimistic locking for safe concurrent balance updates.
- Designed an event-driven notification pipeline over RabbitMQ (with dead-letter queue), secured via JWT, BCrypt, and role-based access control with Spring Security.

FinSight AI — AI-Powered Financial Document Intelligence (Java 17, Spring Boot, Spring Cloud Gateway, pgvector) — github.com/adeoluwadavid/finsight

- Built a four-service microservices platform behind a reactive Spring Cloud Gateway with schema-per-service isolation and centralized JWT edge authentication.
- Engineered a Java RAG pipeline integrating Groq (Llama 3.3 70B) and Jina embeddings with pgvector semantic search, plus PDF invoice extraction via Apache PDFBox.

EDUCATION

B.Sc. Electronic Engineering — University of Nigeria, Nsukka | 2012 – 2017

CERTIFICATIONS & TRAINING

AWS Cloud Developer (Udacity) • LangChain for AI Development • Design Patterns in Python • ALX Cloud Developer Scholar • Google Africa Developer Scholarship
